

Aparna Ramesh Pai

Stockholm, Sweden

aparnapai247@gmail.com — +46 734893863 — linkedin.com/in/aparnarpai

PROFESSIONAL SUMMARY

Master's student in Data Science, Statistics, and Decision Analysis at Stockholm University. Known for being a collaborative team player with a communicative, outgoing nature, I thrive in diverse environments and integrate naturally into cross-functional teams. Actively seeking data-driven and AI roles in Sweden.

TECHNICAL SKILLS

Programming & Tools: Python, R, SQL, NumPy, Pandas, Scikit-learn, Power BI, Excel, n8n

Machine Learning: Supervised and Unsupervised Machine Learning, Predictive Modeling, Neural Networks, Media Mix Modeling (MMM), LLMs

Data Analysis: Exploratory Data Analysis (EDA), Statistical Modeling, Risk Analysis

Visualization: Power BI Dashboards, Data Storytelling

Domain Knowledge: Predictive Maintenance, Energy Analytics, Sustainability Metrics

Language: English (Fluent), Korean (Intermediate), Swedish (Beginner)

EXPERIENCE

Data Science Intern

Jun 2025 – Aug 2025

Aditya Auto Products & Engineering Pvt. Ltd., Bengaluru, India

- Collaborated with maintenance teams to deploy sensors and collect real-time power press data, ensuring reliable and continuous data pipelines.
- Designed and implemented a predictive maintenance platform combining sensor data, machine learning, and an LLM-based interface for natural language queries, which enabled early fault detection
- Built breakdown diagnosis and prescriptive recommendation modules using LightGBM and expert rules, achieving **86% accuracy** on a highly imbalanced dataset.

Data Analyst Intern

Nov 2023 – Apr 2024

Bosch, Bengaluru, India

- Conducted baseload energy consumption analysis for Bosch's Adugodi campus using Power BI and Zoho Analytics.
- Developed interactive dashboards that identified energy waste patterns and supported data-driven sustainability initiatives.
- Delivered insights that informed energy conservation strategies and contributed to greener operational practices.
- Collaborated cross-functionally with engineering and operations teams to support scalable, eco-friendly solutions.

Machine Learning Intern

February 2023 – June 2023

Indian Institute of Science (IISc), Bengaluru, India

- Developed a neural network model alongside a Ph.D student to predict streamflow at the Netravati River outlet as part of a climate and hydrology research project.
- Achieved **92% prediction accuracy** through model tuning, feature analysis, and performance evaluation. Performed data visualization and result interpretation to support research insights.

EDUCATION

Master of Science in Data Science, Statistics and Decision Analysis

Sept 2024 – Jun 2026

Stockholm University, Sweden

Bachelor of Technology in Artificial Intelligence and Machine Learning

Oct 2020 – Jun 2024

B. M. S. College of Engineering, India

PROJECTS

- HOLESOM: Hunting for "Hidden" Black Holes with Self-Organizing maps
- Flexibility of Nuclear Plants in the Nordic Electricity Market- Masters Thesis Project
